### **Abstract**

Plant parasitic species belonging to order Tylenchida and Aphelenchida, soil and sewerage water nematodes belonging to Rhabditida, Diplogastrida, Cephalobida, Dorylaimida, Mononchida, Enoplida, Chromodorida and Monhysterida were studied. These nematodes belonging to 88 genera, 45 families and 10 orders have been identified. New genera and new species are being further studied. A total of 43 genera and 20 species have been recorded for the first time from Pakistan.
