**Abstract**

*Zygotylenchus guevarai* was recorded from most of the countries of the world around the roots of various hosts. (Tobar Jimenez, 1973, Tobar Jimenez, *et al.*, 1974; Siddiqi, 1975; Bratus, 1976; Decker & Manninger, 1976; Katalan-Gateva & Gudurova, 1979; Brzeski, 1979). This species has not previously been reported from the Indo-Pak subcontinent. Recently during a survey of potato crops in North Western Frontier Province and Baluchistan region, this species was found damaging the roots of potato crop in Quetta and Peshawar.
