OCCURRENCE OF VIRUS VECTOR NEMATODES IN PAKISTAN

K. NASIRA AND M.A. MAQBOOL

*National Nematological Research Centre,
University of Karachi, Karachi-75270, Pakistan.*

Abstract

Surveys by the authors and other workers of the known virus vector nematodes associated with various vegetables, fruits, cereals and other crops carried out in Pakistan revealed the occurrence of *Xiphinema americanum* Cobb, 1913; *X. brevicolle* Lordello & Da Costa, 1961; *X. index* Thorne & Allen, 1950; *X. rivesi* Dalmasso, 1969; *Longidorus elongates* (de Man, 1876) Thorne & Swanger, 1936; and *Paratrichodorus minor* (Colbran, 1956) Siddiqi, 1974.
